

## Display board

This resource is to create a display board using the children's suggestions on what they can do individually, or what the school can do to help with climate change. As a result of the assembly, children should have thought of different ideas that they could do to help save the environment.

### **Activity (10 minutes max needed)**

- Class discussion – mind map on the board of all the children's ideas to be collated.
- Children to vote what their top 5 ideas and teacher to write these onto the speech bubbles.
- Speech bubbles from all classes to be brought together and put up onto a display board.
