

## SOS From The Kids – Our Planet

### **Chorus:**

**This land is your land and this land is my land  
From California to the New York island  
From the redwood forest to the Gulf Stream waters  
This land was made for you and me**

How will the future generations see us?  
We had a choice, Knew the stakes, Saw the signs  
Had the science to teach us, But we chose money over all else  
Saw it creeping up, but we never sought help  
Now we've got a climate crisis, We got shorter seasons,  
We got mass extinction, We got coral bleaching, We got glaciers melting  
We got oil leaking, While the sizes of the beaches on the shores decreasing  
Heatwaves and Drought while the forests burning  
All in the name of corporate earning  
The poor get sicker, The rich get richer  
The lifespan of the planet ticks down quicker  
Killing mother nature on the quest to get the paper  
Now almost everything is looking critically endangered  
Well, except humans but it's easy to tell, The end result of killing nature will be  
killing ourselves, We paved paradise if the price is right  
For a new world without wildlife in sight  
What a place to grown up in, Can't shoot for nothing  
If you can't see the stars in the sky at night, I mean  
We live in an artificial society, Disconnected from what's really happening entirely  
The news don't talk about it politicians keep it quietly  
Under the rug for campaign fun bribery

### **CHORUS**

All this human development giving everybody condos, Now the animals don't got homes  
Clear cutting ancient forests where they used to hunt  
Taking everything they needed and they used it up  
Now they look like refugees with no place to go  
See them wandering confused as they pace the road  
Cut through their old world and they span the land  
Like asphalt veins as human demands expand  
Until they're gone for good by the hands of man  
Whether poached or pushed out, They don't stand a chance  
Better take another look or the only elephants and lions  
That your kids will see is in the pages of a book  
Yeah we all just tryna pay our bill nut just do your part  
'Cause there's a worth saving still, I know that making changes is hard to do  
But this change has gotta start with you

### **Chorus X2**
